SEETO South East Europe Transport
Observatory

1. CN Performance in the MAP 2007-2012

- More Dynamics, analyzing and comparing with historic data for all modes
- Traffic estimates by 2012
- More on data quality, data sources and data collection Methodology
- Improved Bottleneck analysis
- Introducing Level of Service (LOS) concept
- Potential Bottlenecks by 2012

2. CN Performance in the MAP 2007-2012

- Road safety
- Railway Bottlenecks
- RW Research on reliability – delay reports
- More on Waterway, Port, Airport traffic and changes
- Delay at the BORDERS – RW & RD (data from collection or other sources)
- Intermodal

SEETO

SOUTH-EAST EUROPE TRANSPORT OBSERVATORY

Questionnaires prepared

- Traffic and Infrastructure - IPR
- Road safety - RSQ
- Traffic Growth - TGQ
- Waiting time on Border Crossings - BCQ
- Intermodal - IMQ

Data Collection Goals

- Fill the gaps by 2006
- Improve Data from 2006
- Collect Additional data (safety, border, Growth)
- Collect Additional data from other public sources
- Improved Digital Mapping

For the Quality of the MAP 2007-2012 it is compulsory to have a successful data collection!

Your contribution is essential.
