**Project Synopsis - continuation**

The global objective of the Project, Sub-action 2, is to support the work of SEETO's Road Safety Working Group with preparation of the Study whose overall objective is to maximize the likelihood of meeting various national targets as set in the strategies of the Regional Participants.

Project Objectives

The specific objective of the project is to prepare the Study which will provide an analysis of the existing road safety policy/strategic framework and action plans of the regional Participants and conclude whether or not it is still sufficient to reach the targets of each SEETO's Regional Participant, given the current and projected road safety trends.

Requested Services

- Analysis of the trend in road safety performance in SEETO region since 2010,
- Screening of the policy, strategic and legislative frameworks,
- Identify the new policies and legislations that Regional Participants should adopt to meet their targets,
- Set up a monitoring framework for road safety indicators in SEETO region,
- Draft a regional short term action plan based on the Regional Participants Road Safety Strategy and in line with the EU Policy Orientations.

Expected Results

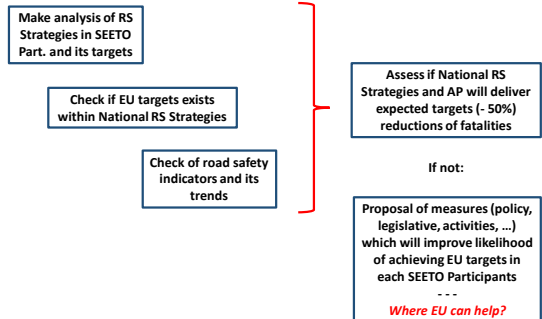

Study with analysis of the existing road safety policy/strategic framework and action plans of the regional Participants (part of Final Report). In addition to that, the study should propose and set up a mechanism for monitoring of road safety indicators as well as draft a ToR for pilot regional actions based on the Regional Participants' Road Safety Strategies.  
*The study should help to understand whether any areas need more, or less, action at the EU level.*
